

APPENDIX D: SHEET PILE DRIVING LOGS

This Appendix (see attached CD) contains the driving logs for the Waterloo Barrier® Sheet Pile Installation.

(NOTE: Computer generated sheet pile depth output is rounded to the nearest foot. Also note that the reference point for the driving logs was different for certain sections of the wall to facilitate the logging process. Sheets 5 through 133, and 224 through 264 were logged using the ground surface as the reference point. Sheets 134 through 223, and 265 through 301 were logged using the bottom of the trench as the reference point.)
